

Your team of 3 is doing the work of 6. But half of it shouldn't be done by humans.

Fix the ops. Free the team.

Who this is for

- Founders running a team of 2 to 5
- Everyone wears multiple hats
- No dedicated ops or admin person
- UK based, any sector

What I do

I spot the repetitive tasks your team is doing manually and automate them.

Example: Turning 5 hours of weekly invoicing, data entry and client updates into a 10 minute automated flow.

- ✓ **Diagnostic to map where time is going**
- ✓ **2 to 3 week sprint**
- ✓ **Highest impact automations implemented**

Results

- ✓ Work that used to take hours runs **by itself**
- ✓ Your team focuses on **the work that actually grows the business**
- ✓ **Capacity to scale** without hiring another person yet

If a task doesn't need human judgement, it shouldn't take up human time.

About me

I'm Anne, Founder of 10PM.

Former head of sales in B2B tech.
Now focused on fixing how small teams actually operate day to day, so they can do more with the people they already have.

Know a founder who keeps saying "I just need one more pair of hands"?

Book a free 15 min call.

I'll spot the quick wins in one conversation.
